SHERIF MONIR

Front-End Web Developer

Phone: **+971 56 695 9744** • Email: sherif.monir.badreddin@gmail.com • LinkedIn: linkedin.com/in/sherif-monir
GitHub: github.com/sherifmonir • Location: **Dubai, UAE**

SUMMARY

Front-end developer building production-style React and TypeScript applications, with hands-on experience debugging authentication flows, database schemas, and state management, using AI tools (Claude, ChatGPT) to speed root-cause research without outsourcing implementation. Brings 14 months of bilingual (English/Arabic) technical customer support experience, translating into strong root-cause analysis and cross-functional communication skills.

PROJECTS

Lumio — Live: my-lumio.netlify.app • Code: github.com/sherifmonir/Lumio

A full-stack Instagram-style social platform built with React.js, TypeScript, Appwrite, Tailwind CSS, and TanStack Query.

- Eliminated duplicate follow relationships with 100% database-level enforcement by designing a normalized follow schema with a compound unique index.
- Eliminated empty-feed states for every new user with zero existing follows by reordering Home and Explore feeds per-fetch based on follow relationships, while preserving infinite-scroll stability.
- Delivered instant search-as-you-type across posts and users, eliminating redundant network requests for shared follow-state data via a single TanStack Query cache that keeps follow counts and button states synced everywhere they appear.
- Diagnosed and resolved a production-blocking 401 authentication failure by isolating 3 distinct root causes—a hardcoded SDK header, an environment-variable parsing bug, and a broken error-handling path—restoring full auth functionality.

Good Story — Live: goodstory.netlify.app • Code: github.com/sherifmonir/good-story

A single-page movie discovery app built with React.js, JavaScript, Appwrite, Tailwind CSS, and the TMDB API.

- Built real-time movie search with a debounced input, minimizing redundant TMDB API calls while rendering poster, title, release year, and rating for each result.
- Built a “Top 5 Trending Searches” feature that tracks and ranks search-query frequency in Appwrite, surfacing the most popular titles in real time.
- Resolved production deployment failures—broken asset paths, missing environment variables, and client-side routing errors—by reconfiguring Netlify redirects and build settings, achieving zero-downtime deploys.
- Delivered a fully responsive UI across mobile, tablet, and desktop breakpoints by styling with Tailwind CSS and testing every layout manually across screen sizes in Chrome DevTools.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Vite, Tailwind CSS, TanStack Query

Backend / Database: Appwrite (Authentication, Database Modeling, Storage)

Tools: Git, GitHub, npm, VS Code, Chrome DevTools, Figma (basics), AI tools (Claude, ChatGPT)

Concepts: Responsive Web Design, RESTful APIs, JSON, Web Accessibility, Debugging & Testing, Database Schema Design & Indexing, Client-side Caching, SEO Fundamentals

EXPERIENCE

Customer Service Representative — Concentrix (Amazon, US market) | Oct 2024 – Mar 2025

- Resolved technical and product-related issues for US-based customers across a broad range of product categories by troubleshooting root causes, consistently maintaining high customer satisfaction scores.
- Improved customer retention by delivering tailored product recommendations and structured issue resolution, directly contributing to strong account-level CSAT.

Customer Service Representative — e& CX Solutions Egypt | Oct 2023 – May 2024

- Delivered bilingual (English/Arabic) technical support to UAE-based customers, resolving the majority of inquiries on first contact through clear, structured troubleshooting.
- Reduced repeat contacts by proactively following up on unresolved cases and guiding customers to tailored solutions, upholding brand advocacy standards across every interaction.

EDUCATION & CERTIFICATIONS

The Frontend Developer Career Path — Scrimba
Completed December 2025

Bachelor's of Law, English Section — Mansoura University
Sep 2017 – Jun 2021

LANGUAGES

Arabic — Native • **English** — Fluent
