SHERIF MONIR

Front-End Web Developer

Phone: +971 56 695 9744 • **Email:** sherif.monir.badreddin@gmail.com • **LinkedIn:** linkedin.com/in/sherif-monir
GitHub: github.com/sherifmonir • **Location:** Dubai, UAE

SUMMARY

Front-End Developer building production-style React and TypeScript web applications with expertise in state management, responsive UI design, and backend integration. Skilled in designing scalable component architectures, managing complex API data flows, and optimizing web performance. Bilingual professional (English/Arabic) with strong root-cause troubleshooting and cross-functional communication skills.

PROJECTS

Lumio — Live: my-lumio.netlify.app • Code: github.com/sherifmonir/Lumio

A full-stack Instagram-style social platform built with React.js, TypeScript, Appwrite, Tailwind CSS, and TanStack Query.

- Eliminated duplicate follow relationships with 100% database-level enforcement by designing a normalized follow schema with a compound unique index.
- Eliminated empty-feed states for new users with zero follows by reordering Home and Explore feeds per-fetch based on follow relationships, preserving infinite-scroll stability.
- Delivered instant search-as-you-type across posts and users, and kept follow counts and button states synced everywhere through a single TanStack Query cache, eliminating redundant requests.
- Enabled conversations on posts by building threaded comments and replies with @mentions in captions, comments, and replies, plus a notifications system for user activity.
- Shipped a light/dark theme and an in-app bug-report feature, giving users control over their experience and a direct channel to flag issues.

Good Story — Live: goodstory.netlify.app • Code: github.com/sherifmonir/good-story

A movie discovery app built with React.js, JavaScript, Appwrite, Tailwind CSS, and the TMDB API.

- Built real-time movie search with a debounced input,minimizing redundant TMDB API calls while rendering poster, title, release year, and rating for each result.
- Built a “Top 5 Trending Searches” feature that tracks and ranks search-query frequency in Appwrite, surfacing the most popular titles in real time.
- Built a movie details page with dynamic routing that loads credits and trailer data in a single TMDB request (append_to_response), with loading, error, and fallback-image states.
- Resolved production deployment failures (broken asset paths, missing environment variables, client-side routing errors) by reconfiguring Netlify redirects and build settings; verified responsive layouts in Chrome DevTools.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks & Libraries: React.js, Next.js, Vite, Tailwind CSS, TanStack Query, shadcn/ui, Aceternity UI, Motion (formerly Framer Motion)
Backend / Database: Appwrite (Authentication, Database Modeling, Storage)
Tools: Git, GitHub, npm, VS Code, Chrome DevTools, Netlify, Figma (basics), AI tools (Claude, ChatGPT)
Concepts: Responsive Web Design, RESTful APIs, Web Accessibility, Client-Side Caching, SEO Fundamentals, Schema Design
Spoken Languages: Arabic (Native), English (Fluent)

EXPERIENCE

Real Estate Lead Generation Specialist — AK Callers (Remote, US Market) | Apr 2025 – Mar 2026

- Made outbound calls to US homeowners to identify property owners interested in selling, working fully remotely.
- Qualified sellers by collecting property and contact details, then passed warm leads to the team leader for follow-up.
- Negotiated price expectations with homeowners over the phone and handled objections professionally.

Customer Service Representative — Concentrix (Amazon, US Market) | Oct 2024 – Mar 2025

- Diagnosed and resolved complex technical product issues for US accounts through structured root-cause analysis.
- Documented issue patterns and user feedback to support cross-functional resolution and workflow improvements.

Customer Service Representative — e& CX Solutions Egypt | Oct 2023 – May 2024

- Provided bilingual (English/Arabic) technical support for UAE enterprise clients under strict SLA targets.
- Reduced repeat tickets by guiding users through structured troubleshooting and explaining technical concepts clearly.

EDUCATION & CERTIFICATIONS

The Frontend Developer Career Path — Scrimba — Completed December 2025
Bachelor’s of Law, English Section — Mansoura University — Sep 2017 – Jun 2021
